Summary

Final-year Computer Science Engineering student focused on data science and machine learning, with a strong software development background (Java, Python, backend APIs). Built and deployed end-to-end ML and GenAI projects spanning predictive modeling, computer vision, and production-ready ML services.

Technical Skills

- **Languages:** Python, SQL, Java
- **Machine Learning:** Regression, Classification, Clustering (K-Means), Feature Selection, Model Evaluation, NLP, Scikit-learn, TensorFlow
- **GenAI & Computer Vision:** LangChain, LLM Integration, Text-to-SQL, OpenCV, YOLOv8, Real-Time Detection
- **Data Science & Analytics:** Pandas, NumPy, Exploratory Data Analysis, Probability, Hypothesis Testing, Seaborn, Matplotlib, Power BI, DAX, Excel
- **Deployment & Backend:** FastAPI, Streamlit, REST APIs, Git/GitHub, Google Colab
- **Software Development:** Java, Servlets, JSP, Hibernate, JDBC, Spring, Maven, Apache Tomcat
- **Databases & Cloud:** MySQL, SQLite, AWS (AWS Academy Certified)

Projects

EV Customer Segmentation & ML Deployment Python, Scikit-learn, FastAPI, HTML/CSS

- Built an unsupervised K-Means clustering model to identify distinct EV market customer segments from behavioral and demographic data.
- Deployed the model as a production-ready FastAPI service delivering real-time segment predictions.

Smart Traffic Management System Python, FastAPI, OpenCV, YOLOv8, JavaScript

- Built a real-time computer vision system using YOLOv8 and OpenCV to detect vehicle density and dynamically optimize traffic signal timing.
- Engineered adaptive signal logic with emergency-vehicle override and a live monitoring dashboard.

Text-to-SQL Co-Pilot (GenAI) Python, LangChain, Claude, SQLite, Streamlit

- Built a GenAI co-pilot that converts natural-language questions into SQL queries over a SQLite database using LangChain and Claude.
- Developed an interactive Streamlit interface so users can explore data without writing SQL.

AI-Powered Import–Export Intelligence System Python, FastAPI, Pandas, JavaScript, HTML/CSS

- Developed a full-stack web platform analyzing product-country trade data to surface market opportunity, demand, and risk insights.
- Integrated an AI chatbot and interactive visualizations to support data-driven trade decision-making.

Customer Churn Analytics Dashboard Power BI, DAX, SQL

- Built a two-page Power BI dashboard analyzing 10,000 bank customer records across three countries, with custom DAX measures and a Key Influencers visual.

Hospital Appointment System Java, Servlet, JSP, Hibernate, MySQL, Tomcat

- Built a role-based (Patient/Doctor/Admin) web platform with slot-based booking and pessimistic locking to prevent double-booking under concurrent access; packaged as a Maven WAR.

Education

Dr. Babasaheb Ambedkar Technological University (DBATU) Expected 2027

Bachelor of Technology, Computer Science and Engineering (Lateral Entry)

Shri Siddheshwar Women's Polytechnic (MSBTE) 2021 – 2024

Diploma in Information Technology – 82.60%

Certifications

- Job Simulations: Accenture (Data Analytics & Visualization), Deloitte (Data Analytics), Quantium (Retail Analytics), Tata/Forage (GenAI-Powered Data Analytics)
- AWS Cloud Architecture (Amazon Web Services) | AWS Cloud Foundation (Amazon Web Services) Power BI – Skill Course | Java 17 – LinkedIn Learning

Achievements & Leadership

- Coordination Lead, National-Level Technical Event – managed cross-team collaboration.
- Secretary, CSE Department | Active Member, CSE Scholars Association
